

IFTE 2022

Educating Teachers for a Changed World: some observations on foundational values, technical capability, and cultural understandings required to teach ethically.

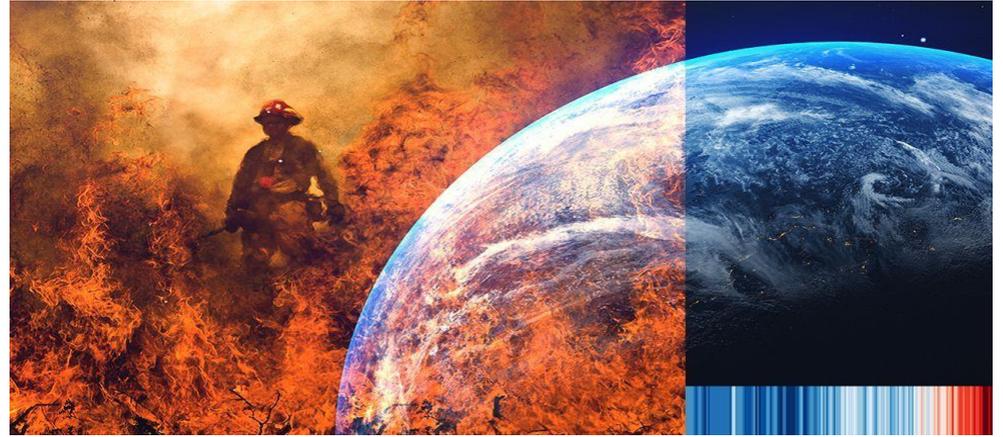

Conor GALVIN, PhD
IFTE Associate

25 MAY 2022

Unprecedented system 'shock'...

And yet...

How do we educate, guide & support (student)teachers in building confident, as well as open, creative, inclusive, and effective practice?

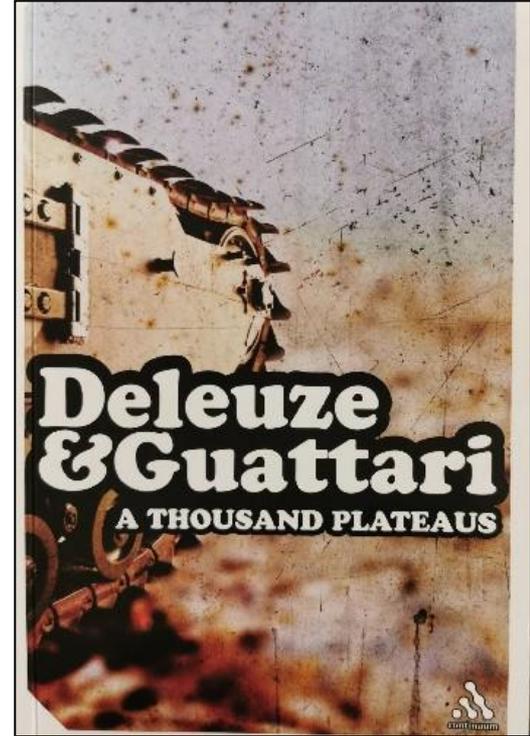

In short: how do we ensure teacher *quality*?

So, there is this... Assemblage theory.

A different 'style' or approach to thinking about an issue

“ ...tries to combine conceptual bricks in such a way as to construct this kind of intensive state in thought. The way the combination is made is an example of what Deleuze and Guattari call consistency—not in the sense of a homogeneity, but as a holding together of disparate elements (also known as a "style").

A style in this sense, is a *dynamic* holding together.... ”

1987

TEACHER QUALITY

Three determinants
of teacher quality...

- CULTURE; a way of thinking about the world, a curiosity, a constant *why*?
- EXCELLENCE; the technical ability to achieve your goals, with grace...
- INTEGRITY; a voice from a person that can be trusted to speak truth.

THE POWER OF NETWORKS OF RESEARCH & PRACTICE

From the IFTE 2021
Special Session with
Tomsk State University

Dr Elena SUKHANOVA (Tomsk State University)

INTEGRITY

The quality of being honest and having strong moral principles. Ultimately, integrity is based on values rather than personal gain.

As a person you are:

- honest
- trustworthy
- responsible
- patient
- dependable
- values-led

AT WORK :

- You practise and encourage open and honest communication
- You are responsible for your duties and see things through
- You are fair to all.

Integrity is doing the right thing,
even when no one is watching.

— *C. S. Lewis* —

AZ QUOTES

The ultimate measure of a man is not where he stands in moments of comfort and convenience, but where he stands at times of challenge and controversy.

— Martin Luther King Jr.

ATEE Annual Conference
(Re)imagining & Rethinking Teacher Education
WARSAW, 10-11-12 September 2021

(Re)imagining & Remaking Teacher Education: Identity, Professionalism and Creativity in a Changed World

“ ...emphasizes at least two aspects of teacher education. The first is **the ability to encounter unforeseen circumstances** that appear in educational practice. We teachers have to constantly learn how to respond to challenges of the changing world if our students are to dwell in the world successfully. The second aspect indicates the **necessity of cultivating creativity** as a crucial educational and social value. Imagination is indispensable to valuable educational activities, particularly if they are to strengthen social justice in these difficult pandemic and political times. ”

Prof. Rafał Godoń
WELCOME ADDRESS

“ Redefining the purposes of education

Education systems have wrongly instilled a belief that short-term prerogatives and comforts are more important than longer-term sustainability. They have emphasized values of individual success, national competition and economic development, to the detriment of solidarity, understanding our interdependencies, and caring for each other and the planet.

Education must aim to unite us around collective endeavours and provide the knowledge, science, and innovation needed to shape sustainable futures for all anchored in social, economic, and environmental justice. It must redress past injustices while preparing us for environmental, technological, and social changes on the horizon.

A new social contract for education must be anchored in two foundational principles: (1) the right to education and (2) a commitment to education as a public societal endeavour and a common good.

H.E. MS. SAHLE-WORK ZEWE

President, Federal Democratic Republic of Ethiopia
Chair, International Commission

”

REIMAGINING OUR FUTURES TOGETHER — A new social contract for education **Introduction** 11

The commission focused on rethinking the role of education, learning and knowledge in light of the tremendous challenges and opportunities of predicted, possible, and preferred futures.
